

Mobile MX5D

Dynamic and Mobile

Gregg Drilling's MX5D was custom built for the sole purpose of operating in Alberta. This drill has been mounted on an International chassis for easy and swift transportation. With the unique 2 winch, 2 sheave system this drill has 4,000 lbs of winch pull, subsequently increasing sampling speed. Outfitted with auger racks, pumps and a water tank, this rig allows for efficient moves and eliminates the need for additional support units. The MX5D is proficient in augering and is suitable for many geotechnical and environmental drilling programs.

Dimensions:

Width: 2.43m (8') | **Length:** 7.6m (25') | **Height (mast raised):** 7.3m (24')

Rig Features:

- Head Stroke: 173cm (68")
- Slide base travel: 51cm (20")
- Pull Back: 17,000 lbs
- Rotation: 7,000 lbs
- Winch Pull: 4,000 lbs
- On board pumps
- On board rod racks
- On board water tank
- Outrigger system for stability
